Technologies for Enhanced Security

U.S. DEPARTMENT OF
ENERGY

Recognize the Enhanced Security Level parameters and measures recommended by NSS 9-G (Rev. 1).

Methods Used to Enhance Security Systems

- Guards, guns, and gates
- Defense-in-Depth
- Graded Approach
- Measures to address the security functions:
 - Deter
 - Detect
 - Delay
 - Respond

Overpacks

- Overpack loaded/unloaded without removal from transport vehicle
- Overpack mounted in a variety of vehicles
- Ability to modify size
- Various electronic configurations
- Multi-layer wall structure
- Visual “decoys” (non-operational bolts and keys)

Chains and Locks

- High security, robust locks of boron steel or similar:
- In a closed conveyance
- On an open conveyance

Tactical Radio Communications

- Effective communication requires interoperability
- Strategic personnel can communicate by radio with staff from other agencies (on demand and in real time)
- Technological solutions vary
- Some agencies utilize more than one type of technology

Example Application of Enhanced Security Level Technologies

CARGO VEHICLE

ESCORT VEHICLE

**ENHANCED RESPONSE
FORCE CAPABILITIES**

ENHANCED GUARD, COMMUNICATIONS AND TRACKING CAPABILITIES

Deterrence

- Enhanced packages, locks, and tie-downs
- Communications and escorts

Detection

- Package tracking
- Seals and TIDs
- Sensors
- Alarms

Delay

- Access impediments
- Material movement, removal, and dispersal impediments

Response

- Communications
- Command and control

Deterrence

- Enhanced packaging
- Enhanced tie-downs
- Communications
- Escorts

Detection

- Intrusion Detection
 - Door sensor (balanced magnetic switch)
 - Closed circuit camera
 - Tamper Indicating Devices (TIDs)
- Alarms
 - Visual/audible alarm from cargo vehicle
 - Remote alarm notification
- Communications

Delay

- Locks
- Secure tie-downs
- Secure packages
- Visual obscurant (smoke)
- Armor

Delay

- Remote disablement
 - Provides the ability to immediately disable the cargo vehicle from one or more alternate locations
 - Increases the available time for protective force response

Response

Communications

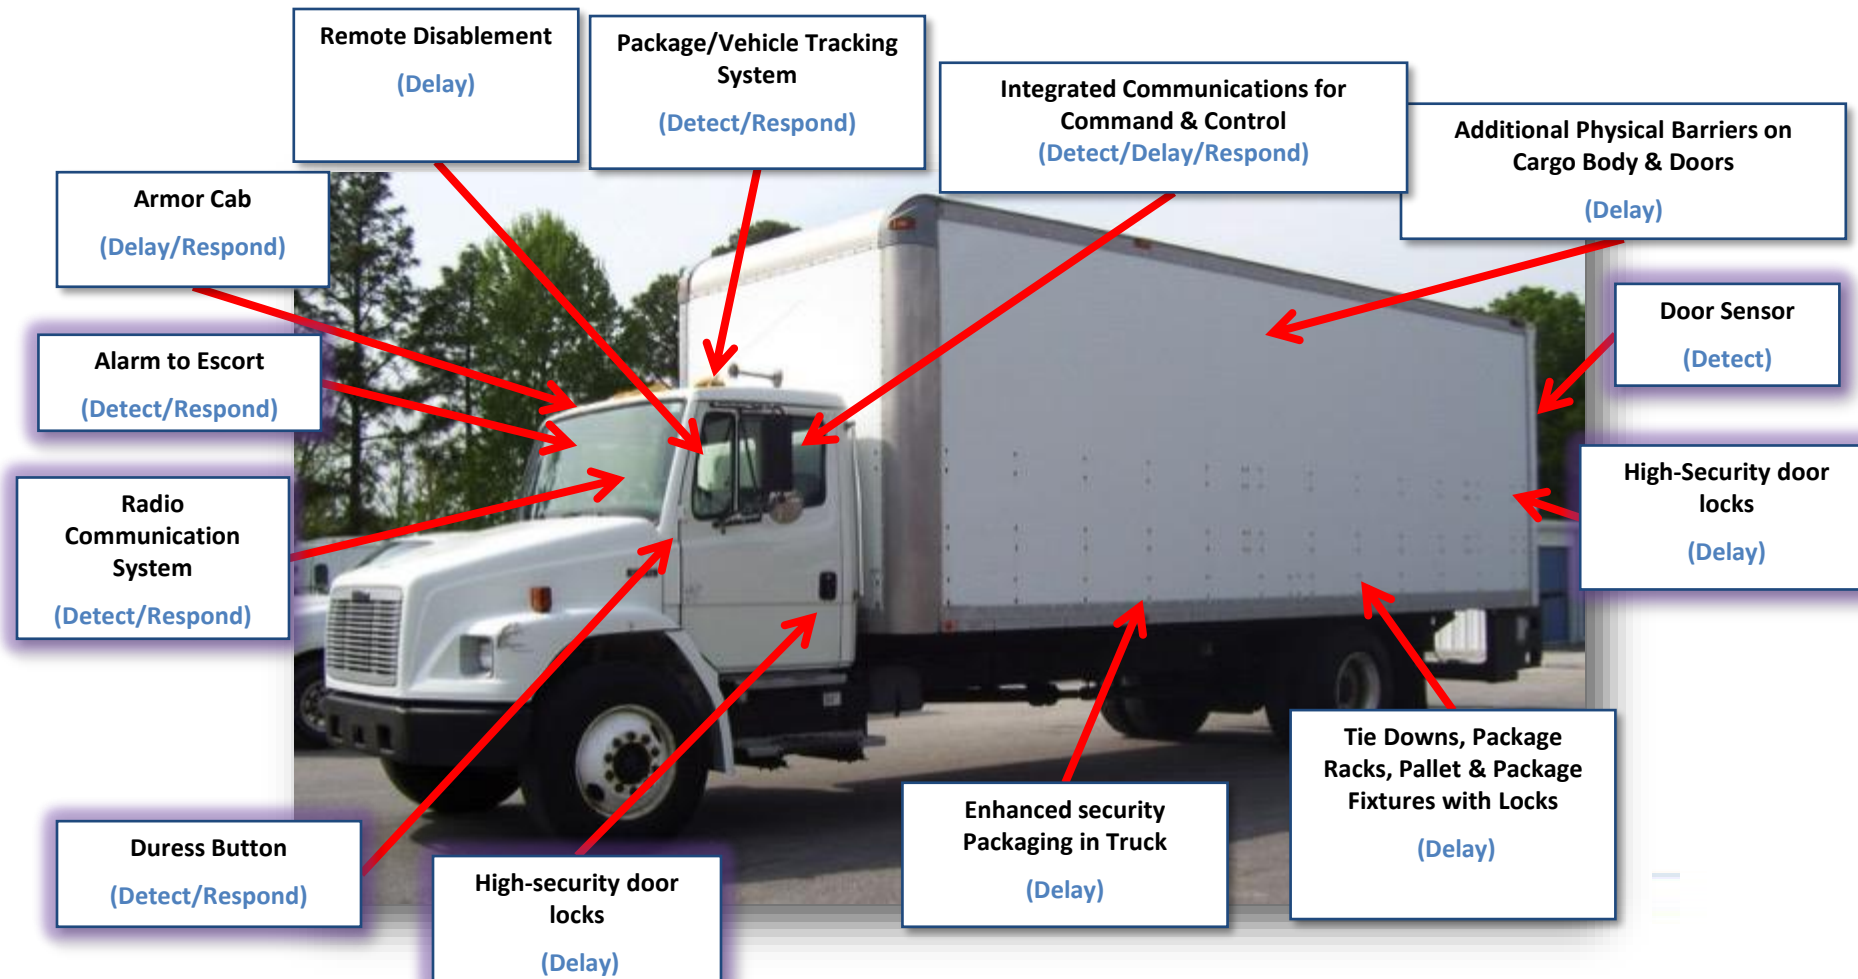

Command

Control

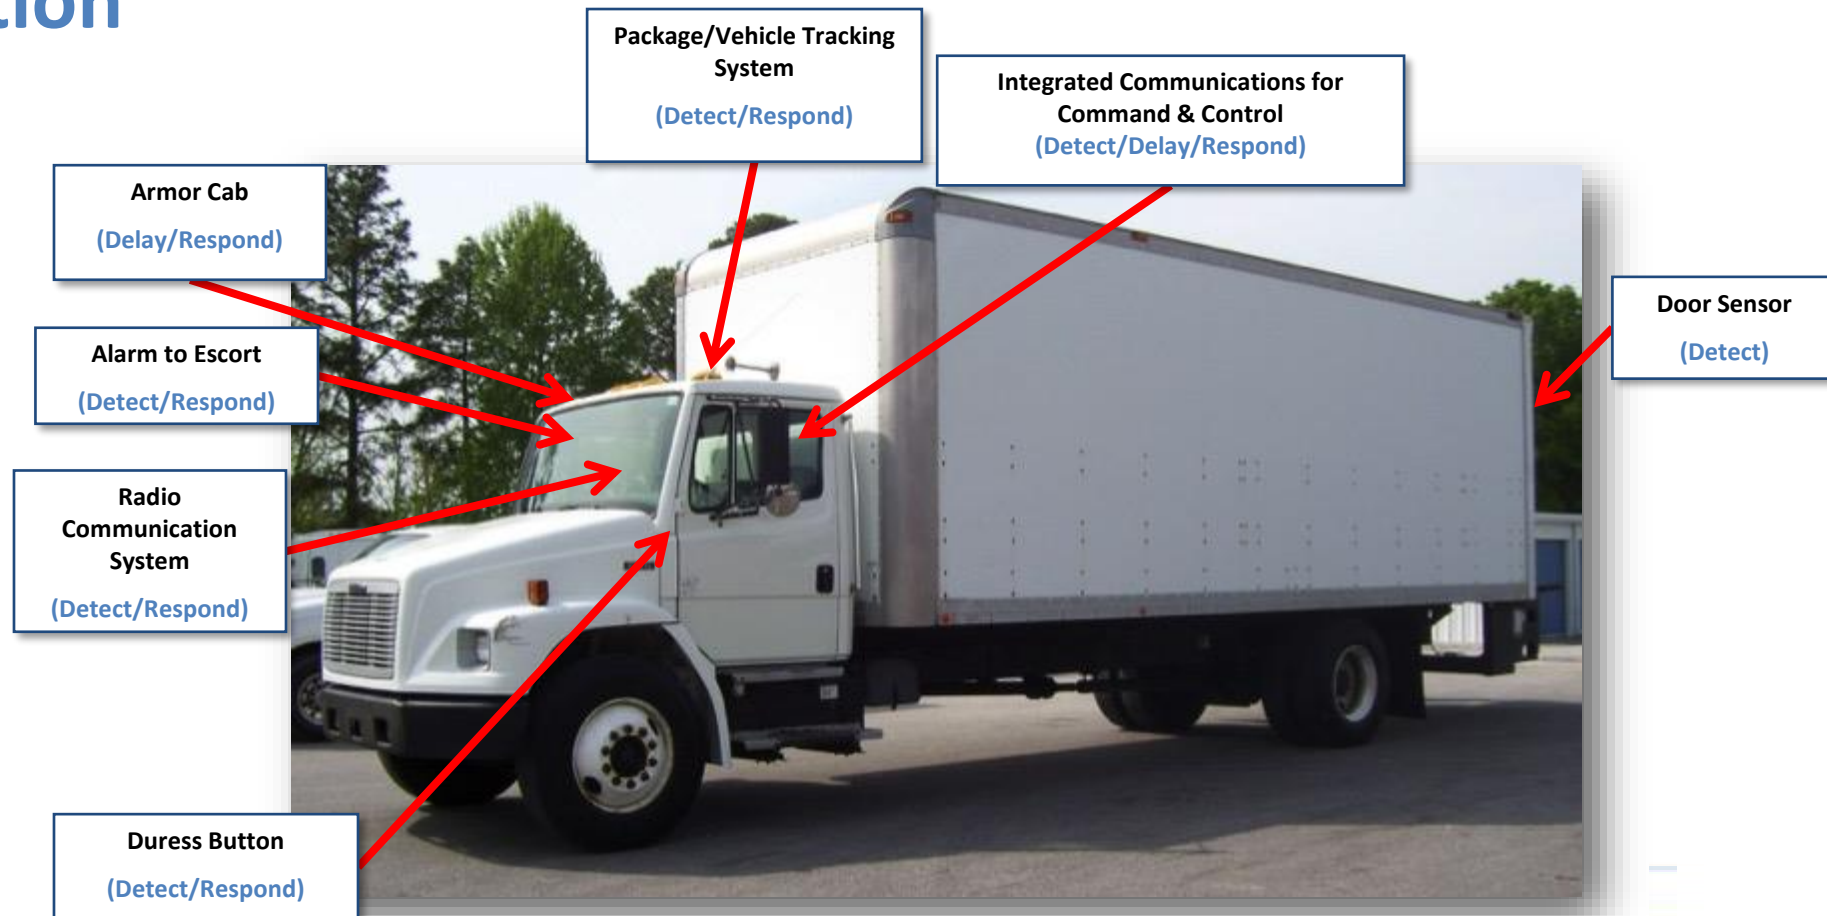

Cargo Truck with Enhanced and Additional Security Features (1 of 5)

Cargo Truck with Enhanced and Additional Security Features (2 of 5)

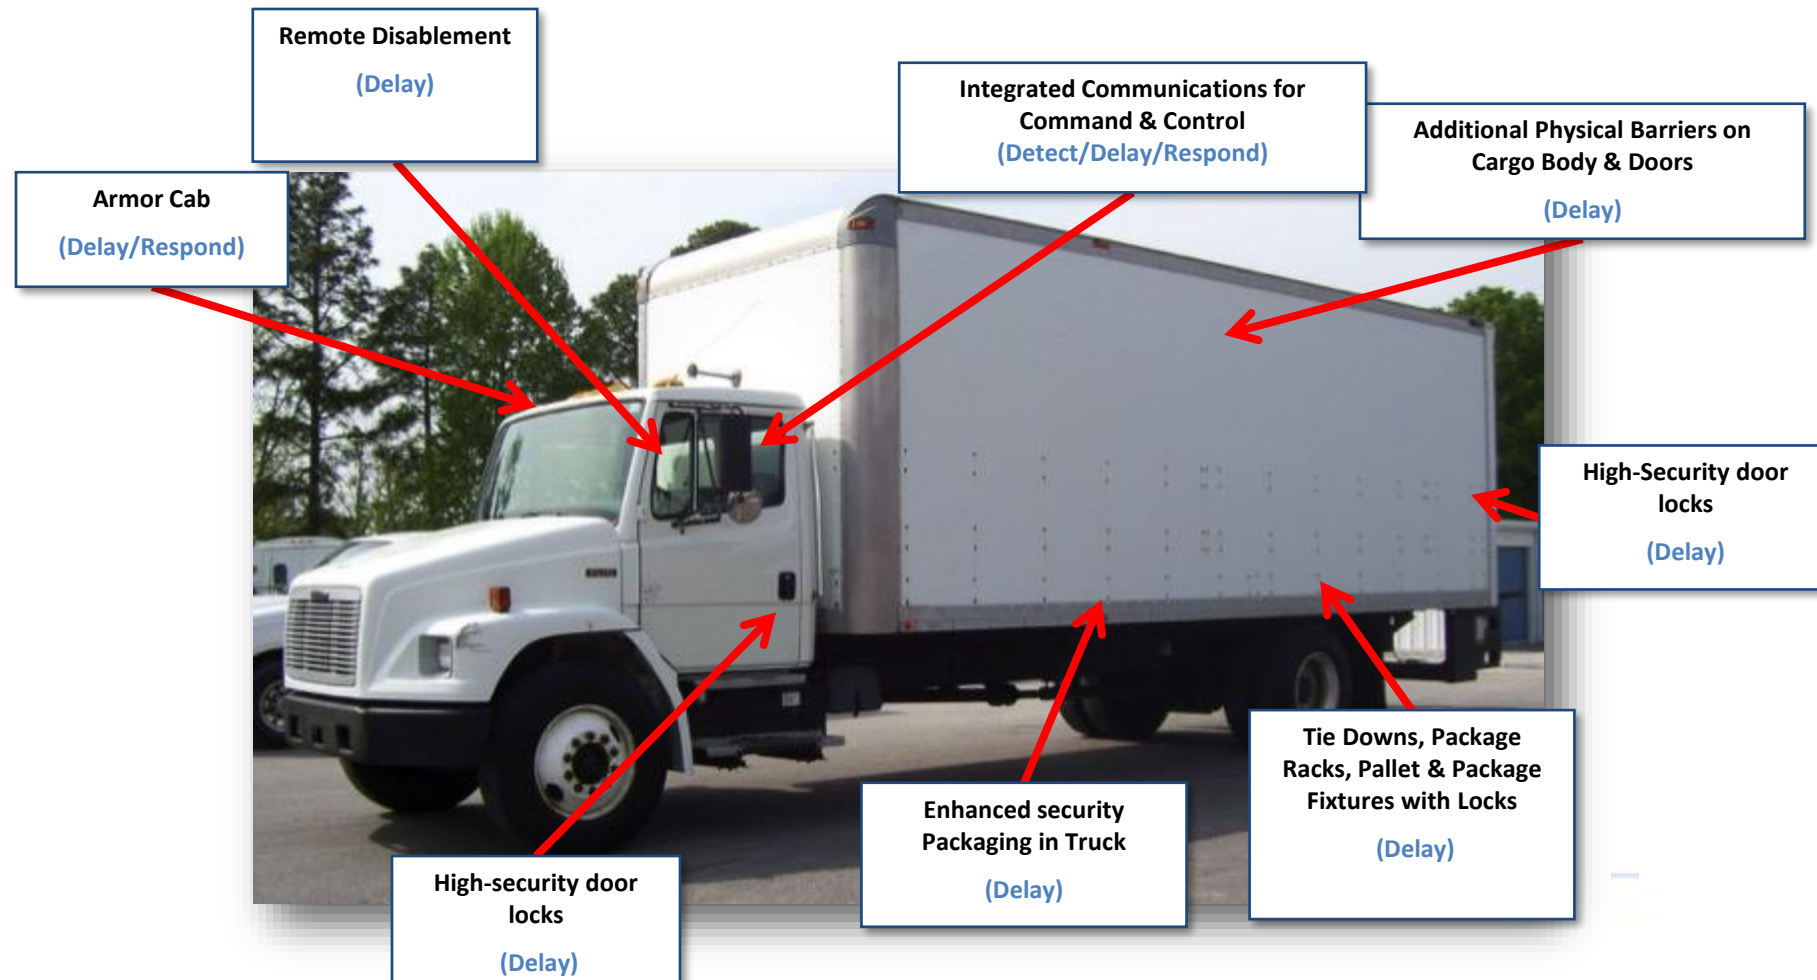

Detection

Cargo Truck with Enhanced and Additional Security Features (3 of 5)

Delay

Cargo Truck with Enhanced and Additional Security Features (4 of 5)

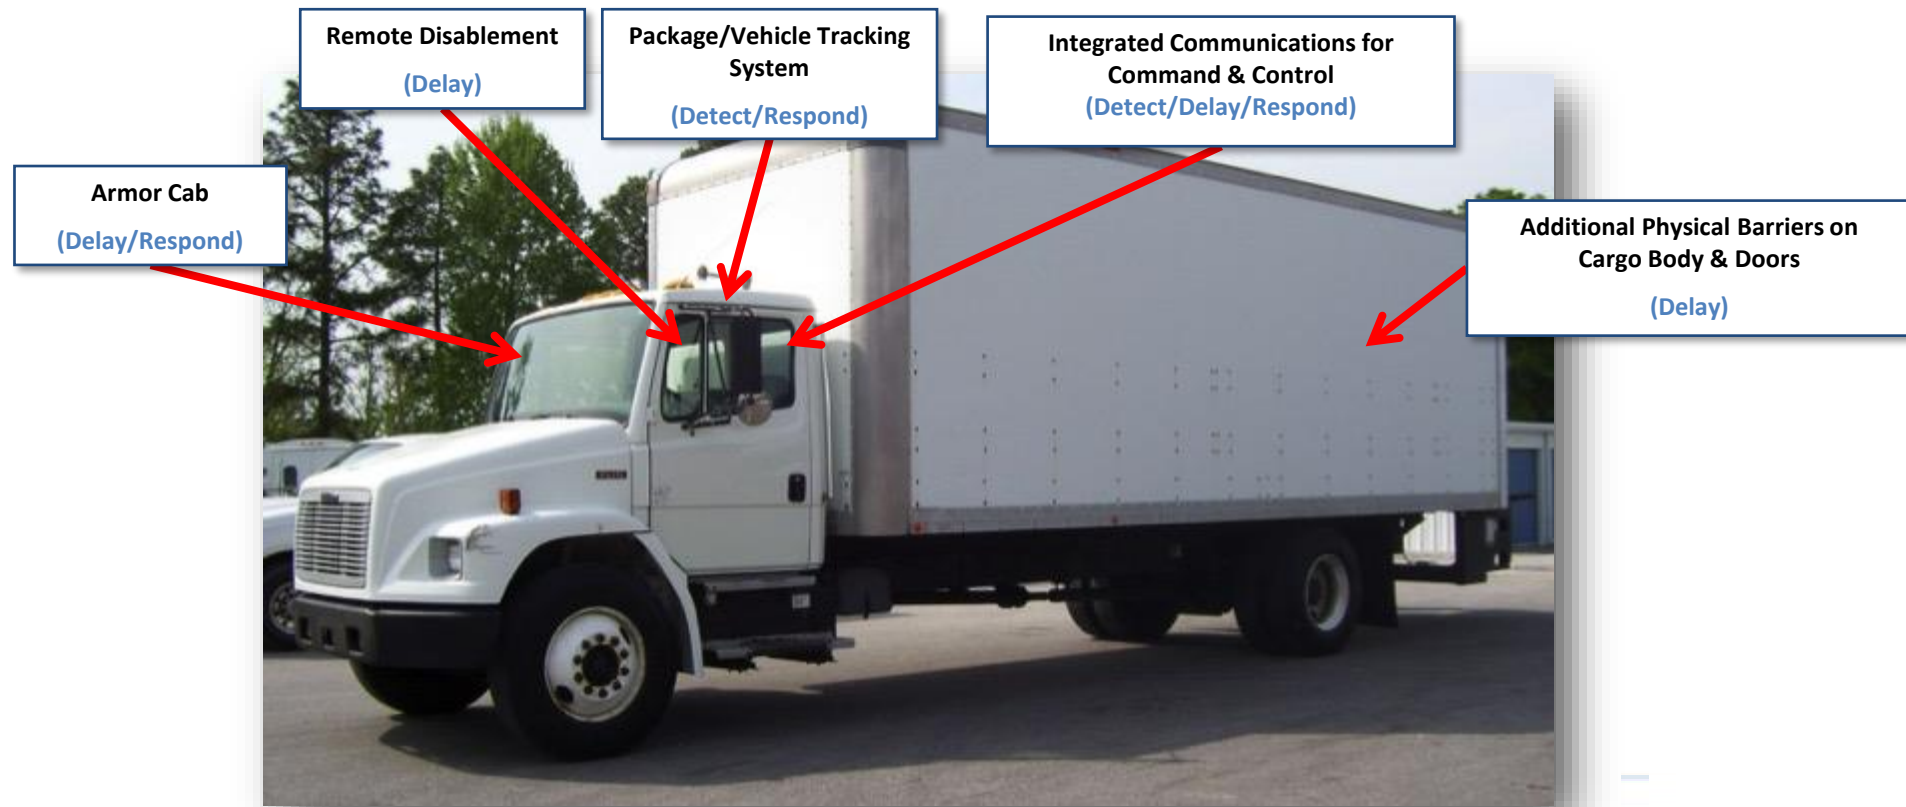

Response

Cargo Truck with Enhanced and Additional Security Features (5 of 5)

Additional/Enhanced

- The Enhanced Security Level is applied to shipments with activities that exceed the Enhanced threshold
